Integration**

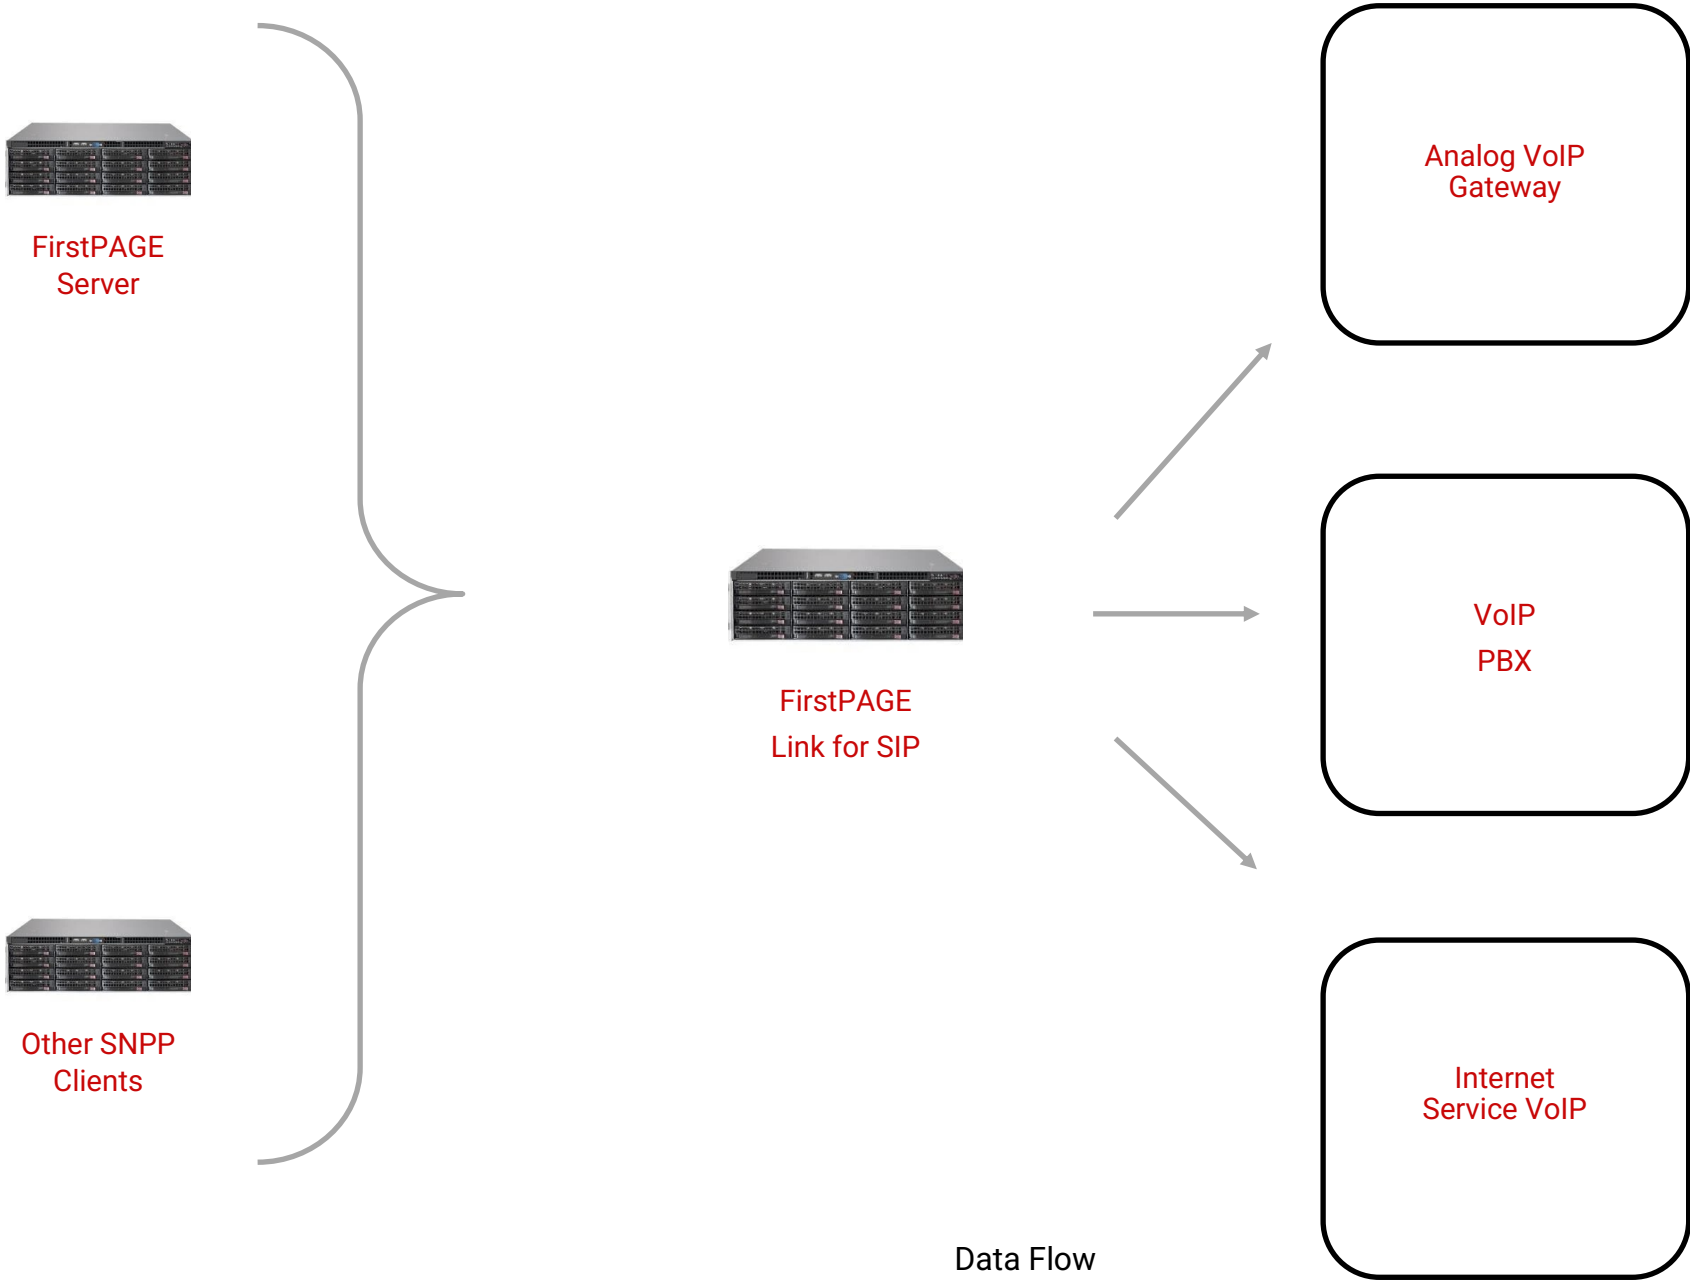

SIP Integration

Overview

SeQent's Link for SIP is an offboard protocol extension for FirstPAGE Server enabling voice enunciation over SIP based devices. For SIP PBX solutions or SIP Gateways the Link for SIP can place an outgoing call and upon answer release an audible version of the text message.

- FirstPAGE software offers a generic interface to a multitude of messaging platforms, enabling simplified communication and configuration. With support for many output protocols or platforms, including email, SMS, databases, voice and two-way radios, combined with various connectivity options (serial, modem, TCP/IP, databases), it allows for a vast combination of custom implementations.
