SeQent

ALARM NOTIFICATION SOFTWARE

Our Alarm Notification Software is the only platform in the world that natively has integration between industrial software vendors Rockwell Automation, PTC, and Motorola Solutions for audio and text message dispatch.

RIGHT PERSON. RIGHT TIME. RIGHT DEVICE.

Plant floor communication is critical, and you need a solution that you can rely on. Our Alarm Notification Software is easy to install and infinitely scalable. Monitor alarms and events from a variety of different systems, from Building Management (BMS), Distributed Control (DCS), Manufacturing Execution (MES), HMI/SCADA systems or direct equipment via interfaces to PLCs or databases. When an alarm or event occurs, it will automatically escalate through a pre-defined hierarchy until acknowledged and will send key information to the right person at the right time on whatever communication device that is configured.

KEY FEATURES

1. Interfaces to Rockwell FactoryTalk View SE, PTC ThingWorx, OPC, & ODBC
2. Repeats, alarm Escalation, and acknowledgement
3. Initial delay suppresses momentary alarms until a full alarm condition is detected

INCREASE PRODUCTIVITY

Improve productivity by reducing unscheduled downtime and holding employees accountable.

INCREASE QUALITY

Enhance quality by improving first-time yields and bridging quality systems.

INCREASE PROFITABILITY

Increase profitability by reducing scrap and improving productivity and quality.
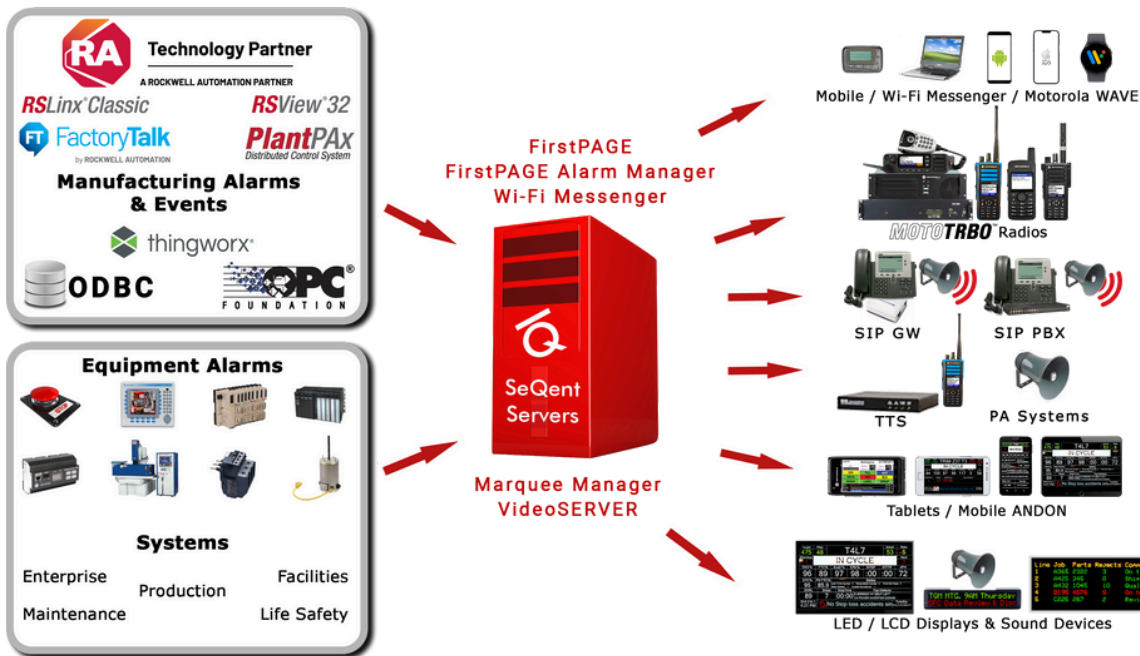

CUSTOMER SPOTLIGHT

"We met SeQent at the Automation Fair® event by Rockwell Automation in Houston. With assistance from our Rockwell Automation Authorized Distributor Border States and our Motorola Solutions Dealer Electronic Engineering, a formal introduction was made, and we successfully installed a turnkey solution that built a software bridge between our FactoryTalk® View SE A&E environment and our Motorola Capacity Plus two-way radio system. This solution has transformed our plant floor communication process, and SeQent has demonstrated a willingness to take Voice of Customer (VoC) requests and make the appropriate changes. For instance, we met with them at the Rockwell Automation TechED event in San Diego, and within a couple of months, our enhancement request was delivered, and the system is functioning as promised and expected. We are also in the process of increasing our milk and cheese capacity by 40% and the expansion will be completed in 2025 and SeQent is an integral part of this".

Mark Lee - Automation Supervisor, Valley Queen

SeQent
Real-Time Decision Solutions

SeQent is a leading industrial automation software provider and early pioneer in the Industrial Internet of Things (IIoT) space. We provide our customers with innovative, reliable, and cost-effective Smart Factory Software solutions. Our Alarm Notification Software, ANDON-Visual Display Management, Industrial Automated Messaging, and Industrial Wi-Fi SMS Messaging solutions build a bridge between automation systems and communication devices. Our solutions provide end-users with key information so real-time decisions can be made that positively impact productivity, quality, and the bottom line.

Industries:
- Automotive
- Consumer Packaged Goods
- Food and Beverage
- General Manufacturing
- Heavy Equipment
- Life Sciences
- Metal and Mining
- Semiconductor
- Water and Waste Water
