# WAVE PTX Integration

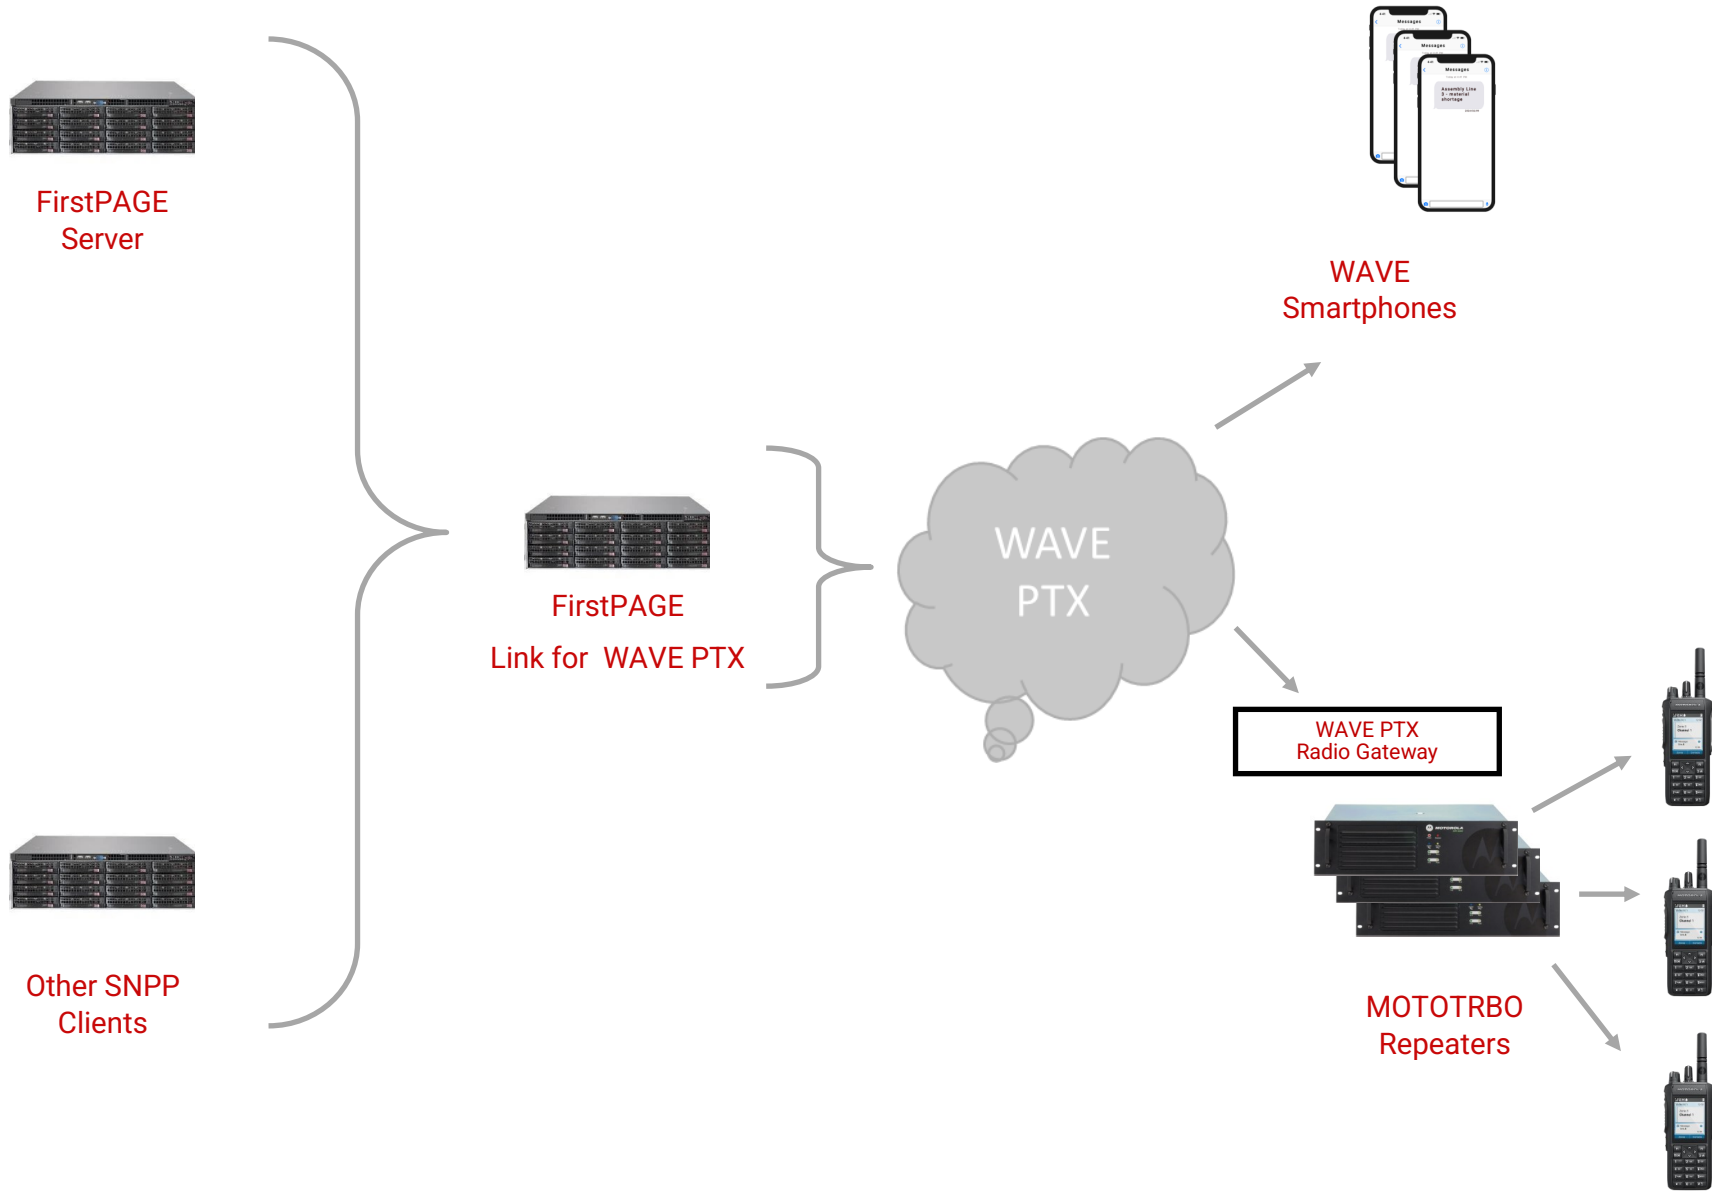

## Overview

SeQent's FirstPAGE Link for WAVE PTX provides an SNPP interface to the WAVE PTX Broadband Push-To-Talk infrastructure for voice dispatch of text messages converted to speech. Voice dispatch is supported for any WAVE PTX hosted talk groups.

- FirstPAGE software offers a generic interface to a multitude of messaging platforms, enabling simplified communication and configuration. With support for many output protocols or platforms, including email, SMS, databases, voice and two-way radios, combined with various connectivity options (serial, modem, TCP/IP, databases), it allows for a vast combination of custom implementations.
- FirstPAGE Alarm Manager monitors alarms and events. Should a monitored alarm or event occur, it will automatically escalate through a pre-defined hierarchy of responsible parties until acknowledged. It sends key information to the right person at the right time on whatever communication device that is configured for that individual.
- Marquee Manager software monitors manufacturing environments and sends real-time, automated messages (Alarms, Events, KPIs, OEE) to visual and audible devices, including LED/LCD displays, smartphones, tablets, and sounder devices.

SeQent's WAVE PTX Links support all versions of WAVE PTX.
